

Orion's 10-year major project plan for Christchurch excluding the eastern suburbs

Over the next **10 years** we plan to fund more than **\$220m** worth of projects to strengthen our electricity network **in the north, west and south of Christchurch**. The top 10 projects are shown in this diagram. We will communicate our 10-year major project plan for the eastern suburbs in August, once our immediate earthquake response work is complete. In total, **we plan to allocate \$730m** to projects across our entire urban and rural network over the next decade.
