

Halswell Flex is a pilot programme that includes support for households and businesses in Halswell to purchase smart energy technologies, such as batteries, smart EV chargers and energy management systems, through approved installers.

Approved installers provide quotes for approved equipment and, if the customer chooses to proceed, a subsidy may be available to help reduce the upfront cost of purchasing and installing these technologies.

To participate in the pilot, installers should:

- Be a current SEANZ Authorised Provider
- Be SOLASSURE™ certified, or be able to demonstrate that you are on a credible path towards SOLASSURE™ certification
- Have a merchant ID (MID), allowing you to accept online payments
- Hold current public liability insurance of at least \$2 million dollars
- Have a transferable installer warranty and service agreement available until at least 31 August 2028
- Be willing to work constructively with Orion and share learnings from the pilot
- Must complete and sign the Approved Installer Agreement
- Understand that the customer contract terms specified in the Approved Installer Agreement must be included and checked off by customers in any quotes or invoices submitted for funding approval

Please note that some of these criteria may not be relevant to every type of installer.

If you have any questions about eligibility or participation, please email us at halswell.flex@oriongroup.co.nz
